

Amendments to the Specification:

Please replace paragraph [0018] with the following amended paragraph:

[0018] The rotating member is comprised of a first driving motor having a first rotating axis immovably fixing the scanner thereon, and the lifting member is comprised of a lifting belt fixing the first driving motor thereon. The lifting ~~rotating~~ member is further comprised of a driving pulley and a driven pulley for supporting both ends of the lifting belt, respectively, and rotating the lifting belt to ascend and descend the first driving motor fixed on the lifting belt. The lifting ~~rotating~~ member is still further comprised of a second driving motor having a second rotating axis connected with an axis of the driving pulley.

Please replace paragraph [0021] with the following amended paragraph:

[0021] The rotating and lifting member may be comprised of a third driving motor having a third rotating axis, and a lifting part fixing the scanner at the third rotating axis to ascend or descend the scanner according to the rotating operation of the third rotating axis. The lifting part may be comprised of one of a circular disk and a bar immovably fixing the scanner at a radial outer end thereof and fixed vertically to the third rotating axis at an end of the third rotating axis.
